PROFILE

Full-stack developer and cloud enthusiast with expertise in **Java, Node.js, MongoDB, SQL, AWS, and Linux**, complemented by **frontend skills (HTML, CSS, JavaScript)**. Skilled in **cloud computing, cybersecurity, and VAPT**, with experience in backend development, threat analysis, and end-to-end project deployment. Adept at problem-solving and applying modern technologies to deliver secure and scalable solutions.

PROJECTS

Yahya Website Security Assessment (VAPT) <i>Kali Linux, Nmap, Burp Suite, Wireshark, OWASP ZAP</i>	Jun. 24 – Aug. 24
- Performed end-to-end Vulnerability Assessment & Penetration Testing (VAPT) on the Yahya company website using Kali Linux tools (Nmap, Wireshark, Burp Suite, OWASP ZAP). - Identified security gaps including exposed server headers, weak cookie flags, and outdated dependencies. - Provided remediation steps such as secure header configuration, stronger session handling, and timely patching.	
Client-Side VAPT Project <i>Kali Linux, Nmap, Burp Suite, Wireshark</i>	Sep. 2024
- Conducted VAPT on a client's web application and internal network following penetration testing lifecycle (Recon → Scanning → Exploitation → Reporting). - Used Nmap, Burp Suite, Wireshark to detect vulnerabilities such as open ports, missing patches. - Delivered a security report with prioritized fixes, helping reduce the client's attack surface by 40%.	
Yahya Company Blog Website <i>HTML, CSS, JavaScript, Git, VS Code</i>	Jul. 2024
- Independently developed a responsive blog website for Yahya using HTML, CSS, and JavaScript. - Implemented a contact form with email response integration. - Deployed via Git/GitHub and optimized for performance using VS Code.
