Professional Summary

Security-focused developer with hands-on experience in building secure applications and performing vulnerability assessments. Experienced in implementing cloud (AWS) security best practices and hardening systems against threats. Skilled at integrating security into DevOps workflows to ensure safe, efficient, and resilient software delivery.

Professional Experience

Full-stack Development Trainee

Aug 2025 – Present

CodeSquadz — On-site, Noida(Java- full stack)

- Integrated security practices into full-stack development workflows.
- Built secure frontend and backend components using React and Java.
- Explored AWS-based deployment models focusing on scalability, availability, and security.

Deployed the application 2nd mon live on Netlify.

Deployed the application 1st mon live on Netlify.

Security Engineer Intern (DevSecOps Focus)

Jul 2025 – Oct 2025

Yahya Cyber Security — Remote

- Conducted application and network security assessments using Nmap, Wireshark, Burp Suite.
- Conducted VAPT on OWASP Juice Shop using Kali Linux and implemented remediation following Secure SDLC practices.
- Assisted in AWS cloud security hardening including IAM review, logging, and network segmentation.
- Assisted in investigating security incidents by analysis, also build this all myself **Company website** – (Live Demo)

Security Operations Intern

Jun 2024 – Sep 2024

Yahya Pvt Ltd — Remote

- Conducted application and network-level security testing aligned with enterprise security programs.
- Supported AWS infrastructure security and security documentation for compliance readiness.

Security & Development Projects

Enterprise Web Application Security Assessment (VAPT)

- Conducted end-to-end vulnerability assessment and penetration testing.
- Identified insecure headers, session weaknesses, and exposed services with remediation guidance.

Admin Dashboard – Development

- Developed a responsive admin dashboard using React, Bootstrap, and modern UI libraries.
- Used Axios for API integration and Recharts for data visualization.
- Implemented form handling, notifications, and interactive components using React Hook Form and React Toastify.

- Deployed the application live using Netlify with version control via Git.

Design of a secure startup network architecture

- Designed a secure Cloud, Endpoint, and Wi-Fi network architecture using Draw.io/Lucidchart.

Education

B.Tech – Computer Science & Engineering (Cloud Computing & Cyber Security)

Invertis University, Bareilly

2021 – 2025

CGPA: 7.9

Technical Skills

AI & Automation Tools: ChatGPT, DeepSeek, Claude, etc

Languages: Java, JavaScript, HTML, CSS

Frontend: React.js, Bootstrap

Backend: Node.js, Java (core)

Databases: MongoDB, SQL

Cloud: AWS (EC2, S3, SQS, SNS), VPC, IAM

Security Tools: Nmap, Burp Suite, etc.

OS & Tools: Linux (Kali, Ubuntu), Git, VS Code, Windows

Certifications

Security Engineer Intern – Certificate of Excellence (Yahya Cyber Security)

Security Operations & VAPT Training

AWS Cloud Security Fundamentals
